

Step 1:
Push the quick connect collet in on the outlet of the flow restrictor to release the black tube.

Step 2:
Push the **Eco-Waste Reducer** firmly into the black tube.

Step 3:
Re-insert the black tube into the flow restrictor. **You now have a 2:1 waste to purified water ratio!**

WARNING: This product reduces waste water and can lead to a reduction in the membrane(s) life. The higher your source water's Parts Per Million are, the shorter your membrane(s) life will be.

USE AT YOUR OWN RISK if source water is above 300 Parts Per Million.
