

PreEvolution™

High-Capacity Pre-Filter for Evolution-RO 1000™

Includes:

- 2-stage 20" x 4.5" pre-filter unit
- Pleated, cleanable sediment filter
- KDF85/55 with catalytic carbon filter
- Wall mountable metal bracket
- 1/2" quick connect fittings
- 4 ft. feed line to the **Evolution-RO1000™**
- Filter housing wrench

- **2 Extra Stages of Filtration Prior to the Evolution-RO1000™**
- **Extends Pre-Filter Life of the Evolution-RO1000™ from 2,000 to 7,500 Gallons***
- **Protects Your Investment and Ensures Maximum Efficiency**
- **Recommended when Producing more than 150 Gallons of Purified Water Per Week Average**

PURIFICATION SYSTEMS

PreEvolution™

High-Capacity Pre-Filter for Evolution-RO 1000™

Options

Ensure your Evolution-RO1000™ runs more efficiently. Helps protect the Reverse Osmosis membranes and lengthens their life. Less filter changes and maintenance - every 7,500 gallons of purified water. Cleanable sediment filter is re-usable. Combination of KDF85 and KDF55 with earth-friendly catalytic carbon filter reduces chlorine, chloramines, iron, sulfur and heavy metals - great for city or well water. Highly recommended when using more than 150 gallons of purified water per week average. Saves time and money.

TDS Monitor

Measure PPM of dirty water going in and pure water going out. Monitors performance of your membranes.

Flowmaster

Gallon meter and filter capacity monitor. Indicates when to change your pre-filter(s).

* Pre-Filter Life Comparison

EvolutionRO1000™ > 2,000g

EvolutionRO1000™ w/ PreEvolution™ > 7,500g
